Sha Crow: Audience Analysis for Upcoming Tour

Presented by Sylvan Quady

Top Streaming Cities for Sha Crow (via Spotify)

1. Los Angeles, CA - 2,592 monthly listeners
2. Chicago, IL - 1,887
3. New York City, NY - 1,497
4. Dallas, TX - 1,287
5. Denver, CO - 1,208

Worth note: **Denver** is not a typical city that shows up for rappers and should be considered an emerging market that does not fit the prediction trend

LA, Chicago, and NYC are hotspots and should be included as tour destinations. The Bay Area should be considered as well as a natural offshoot from LA, as listeners trend similarly for the two areas, and the similarity to **Larry June** in some of Sha Crow's songs lends a gateway to a cult following in the Bay.

Digging Deeper: Instagram

Looking at Industry trends, along with a random sample of Sha Crow's Instagram comments & followers within the last month reveals more cities of interest for touring:

- **Miami, FL:** many of Sha Crow's followers seem to come from the state of Florida, and Miami is known as a hub for high energy rap, making it an ideal location to add as an additional stop on his tour.
- **Detroit, MI:** although Detroit is not as supported by Spotify or IG data, the pipeline for listeners from Chicago to Detroit is one of the strongest in rap, and it is therefore a high-probability market for Sha Crow listeners

Follow the Trends

- **Atlanta, GA:** no specific data to back it aside from a small number of IG comments, however, Atlanta has been one of the strongest cities nationally for rap in the recent past. It is heavily linked to Chicago and LA in terms of larger artists' listener trends, making it a viable option for the tour
- **Houston, TX:** although the cultural identity between Dallas and Houston varies slightly, the two cities tend to trend together when it comes to rap. It can be considered both a geographical and cultural extension of Dallas, a city we have already confirmed is a hotspot for Sha Crow

TL;DR - Sha Crow Tour Cities

1. **Los Angeles**, CA - highest listener count, must have
2. **Chicago**, IL - #2 in numbers, culturally aligned with his sound
3. **New York**, NY - hometown, top 3 confirmed via Spotify, major market always worth the stop
4. **Dallas**, TX - Spotify data backed, gateway into the Houston/general Texas rap market
5. **Denver**, CO - surprising #5, likely organic and worth watching closely in the future
6. **Miami**, FL - followers confirmed via IG, high energy rap hub
7. **Detroit**, MI - Chicago's closest extension, strong cultural overlap
8. **Atlanta**, GA - huge for rap, mirrors his top markets naturally
9. **San Francisco**, CA - Larry June territory, natural West Coast extension
10. **Houston**, TX - Dallas spoke, regional association worth the short drive
